MERCY FROM THE HOSPITAL is Needed in Thousands of Homes, and MONEY FOR THE HOSPITAL is Needed from Thousands of Pockets.

HAVE YOU A SPARE DOLLAR?

Please send your Donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec.-Treas., College St., Toronto.

SPECIAL TO READERS—Please note this report is perforated, so that leaves can be separated and distributed to Public and Sabbath School Children.

ARE THE LITTLE CHILDREN TO BE SICK AND IN PRISONS OF POVERTY AND PAIN, AND IS YOUR MONEY TO VISIT THEM NOT?

"Inasmuch as ye have done it unto the least of these my brethren, ye have done it unto me."

THREE TOTS AT THE LAKESIDE HOME.

"NOW JOHNNIE, ARE YOU COMFORTABLE?"

Let The Hospital tug at the purse strings of your kindness even as the needs of little children tug at the heart strings of The Hospital's Mercy.

AT SCHOOL IN THE HOSPITAL—BIG BOYS.

AT SCHOOL IN THE HOSPITAL—LITTLE GIRLS.

There were 356 of the Patients who attended School during 1912.

The progress made is wonderful. They enter unable to read or write and in three months they send letters to their mothers. One "Mother" wrote to the Superintendent and asked: "Was the letter from Margaret written with her own hand?" "Certainly," was the answer.

A total of about 8,000 bedside instructions given last year, or an average of 40 patients daily receive such instruction from the Public School Teacher.

**YOUR POCKET-BOOK MUST BE THE HOSPITAL'S FRIEND
IF THE HOSPITAL IS TO BE THE CHILDREN'S FRIEND**

Please Remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec.-Treas., College Street, Toronto.

YOUR MONEY CAN PLANT AN OASIS OF HOPE AND HELP AND HAPPINESS IN THE WEARY DESERT OF MANY A LITTLE LIFE.

Every Ward contains 22 beds. There were 246 Girls in these Wards in 1912. See the four nurses attending to the wants of the little patients.

A DOLLAR OR TWO MEANS A SMALL LOAD OF MONEY OUT OF
YOUR POCKET, BUT IT TAKES A LOAD OF MISERY OUT
OF SOME LITTLE LIFE.

THE HOSPITAL FOR SICK CHILDREN

A BANNER YEAR IN ITS GREAT WORK

THE CHRISTMAS STORY OF 1912

No page in the calendar of time contains so much record of good work accomplished as does the last page in the year book which shows the results of loving labor for the sick and afflicted ones—young and old—who tenant the beds and cots of the hospitals of the Dominion.

Appreciation is a virtue that should be more in evidence in the general estimate that people have of the work of the thousands from the Atlantic to the Pacific, who keep never-ending watch and ward in the great Homes of Mercy that minister to suffering humanity.

Hospital Reports in either pamphlet or booklet form cannot be classed as popular literature. They are not catalogued in public or private libraries, although sometimes they find their way to the library table. Then, unless the receivers are human enough to be interested, the reports are shot into the waste basket, pass to the paper maker, are chemically treated, ink extracted, and in this pulpy state pass over the wires of the paper-making machine and finally re-appear, morning and evening, in newspaper form, on the doorstep of your dwelling.

Now, Hospital Reports are not dull and uninteresting reading. There is not a household in the land that at some time in its existence has not had either directly or indirectly an interest in the service of hospitals. And so if hospital reports were read before being hurled into the paper basket, the public would find a human story, true, not a novelette, but a story that would earn appreciation from even the most commonplace reader.

These words are written in the kindest spirit. The idea is that those who read this booklet will pass it to friends, and so make friends for a great charity whose field of labor is the Province of Ontario.

The testimony of the Hospital workers, not only in this Dominion, but in the United States and in Great Britain, is that this Hospital stands as a leader in its work, a model for all other Hospitals for Sick Children in the world.

And so it is that the Trustees of this charity in this, the thirty-seventh year of its existence, issue this annual story in popular form. Every line from cover to cover is entertaining. The work of every department which can be shown by the use of photography, is illustrated, and the results are given in such form that they must convince the reader that within the walls of this charity a grand work for humanity is being carried on.

THE PROGRESS OF THE HOSPITAL WORK.

The work of this Hospital has gone forward by leaps and bounds, so much so that its equipment and accommodation has been tested to its fullest capacity. With wards full, applications for admission meet with delay, and this condition is intensified by the fact that without room for the proper segregation of infectious cases, which are a constant menace in hospitals for children, the work is hampered, and our efforts to save our wards from quarantine are seriously handicapped. The foregoing applies not only to the In but to the Out Department. While the in-patients increased last year by 55, the out-patient record was phenomenal, for the increase over last year was nearly 3,000, and the end is not yet.

EXTENSION OF OUR BUILDINGS.

The conditions related have received the serious consideration of the Trustees, and it was determined that the only way to meet the situation was by an extension of the present buildings. As the Hospital has no funds to make these extensions, an application was made to the Mayor and Corporation of the City of Toronto for a grant which would remodel the interior of the present building and provide a new wing which would connect with the south end of the present wing, which faces Elizabeth Street. The Chairman presented the case in all its details to the Board of Control, and accordingly the Board passed the recommendation for a grant of \$250,000 to remodel certain parts of the old building and erect a west wing. The Council, recognizing the magnificent work the Hospital was doing, at once endorsed the recommendation, and a by-law for \$250,000 received its first and second reading, and it will receive its third reading after the ratepayers of Toronto have voted on the by-law on the 1st of January next. There is no doubt that the ratepayers will grant the money.

Dr. Bruce Smith, one of the inspectors of Hospitals and Public Charities for the Province, an official who is recognized as one of the highest authorities on the continent in connection with hospital construction and requirements, after a close examination of the plans, said that "With these improvements and additions the Hospital will be an ideal building."

STEADY GROWTH FROM 1875-1912.

Since 1875, the records show 19,370 in-patients admitted and 133,724 out-patients treated, a total of 153,094, or an average of 4,138 per year.

Of 19,370 in-patients admitted, 13,875 were from Toronto, and 5,495 from other parts of the province.

Of in-patients, 9,644, or 49¾ per cent., were cured; 5,711, or 29½ per cent., were improved; 1,475, or 7½ per cent., were unimproved; and 1,570, or 8 per cent., died. Patients in the Hospital at the end of each year make up the remainder.

The Hospital work from 1875-1890 did not make a great deal of progress; but from 1891, when the institution was housed in its present building, the increase in patients year by year was far more marked.

THE PAST YEAR'S WORK.

From the 1st of October, 1911, to 30th September, 1912, there were 1,294 treated as in-patients, an increase of 55, compared with the previous year.

In the out-patient, or Free Dispensary, 17,862 were treated, an increase of 2,959 over 1911.

The largest number of in-patients treated in any one day in 1912 was 215; the smallest 106; daily average, 155.

The increase of 2,959 in the Out-patient Department is accounted for by the large emigration to Canada and the large addition to the population of Toronto.

THE RESULTS OF TREATMENT, 1912.

Of 1,294 in-patients treated during the year, 565, or 43¾ per cent., were discharged cured; 345, or 26¾ per cent., discharged improved; 75, or 5¾ per cent., discharged unimproved; 159, or 12¼ per cent., died; and 150, or 11½ per cent., remained in the Hospital.

It is worthy of note that, while our death rate for the year was 159, 11 patients were in the Hospital less than 2 hours, 16 patients less than 8 hours, 49 patients less than 7 days, 24 patients less than 14 days, 27 patients less than 4 weeks; so that 80 per cent. of the 159 were practically beyond hope when admitted.

Of the 17,862 Free Dispensary, or out-patients, the staff claim that 14,289, or 80 per cent., of those who received treatment were cured, and at least 10 per cent. were improved.

NATIONALITY AND RELIGION OF PATIENTS.

Of the 1,294 in-patients, 596, or 46 per cent., were from Canada; 380, or 29½ per cent., from England; 28, or 2 per cent., from Ireland; 93, or 7 per cent., from Scotland; 7, or ½ per cent., from the United States; and the remainder, 190, or 15 per cent., from foreign countries.

Of the 1,294 in-patients, 1,016, or 78½ per cent., were Protestants; 123, or 9½ per cent., Roman Catholics; and the remainder, 155, or 12 per cent., other religions.

AGE AND SEX OF PATIENTS.

Of the 1,294 patients in the Hospital last year, 737 were boys and 557 girls. In 1911 there were 705 boys and 534 girls.

255 were under one year; 108 one to two; 78 two to three; 80 three to four; 90 four to five; 67 five to six; 71 six to seven; 82 seven to eight; 95 eight to nine; 89 nine to ten; 62 ten to eleven; 64 eleven to twelve; 57 twelve to thirteen; 53 thirteen to fourteen; 43 fourteen to fifteen.

THE DAYS' STAY IN HOSPITAL OF EACH PATIENT.

The number of days of Hospital treatment for 1912 was 52,565. For 1911 the number of days was 59,423. The average days' stay of each patient for the year 1912 was 40. In 1911 the average was 48.

We find the average days' stay by dividing the total number of in-patients, 1,294, into the total days' stay, 52,565, of all patients in the Hospital.

COST PER PATIENT PER DAY.

The cost per patient per day is arrived at by adding all the days that each patient has been in the Hospital from Oct. 1st, 1911, until Sept. 30th, 1912—the official year—and then dividing the days into the total expenditure.

In 1912 there were 1,294 patients in the Hospital for 52,565 days, an average of 40 days each, at a total cost of \$104,474.84. In 1911 there were 1,239 patients for 59,423 days, an average of 48 days each, at a total cost of \$93,942.27. The total days were 6,858 less than the previous year.

The cost of each patient per day in 1912 was \$1.98½, or \$79.50 for the 40 days' stay of each patient. The cost of each patient per day in 1911 was \$1.58, or \$75.84 for the 48 days' stay of each patient.

The increase of the per capita rate is accounted for by the fact that although we had an increase of 55 in-patients, the days' stay was 6,858 less than in 1911, for the patients were in for a shorter length of time. The average days' stay in 1911 was 48. In 1912 it was 40. Further, the increased cost of food and other supplies, and nearly 3,000 extra patients in the out-door department, made a very heavy drain on maintenance account.

THE SURGICAL SERVICE.

The number of operations performed last year was 1,307—in the In-patient Department 496, in the Out-patient Department 811—besides many minor operations not recorded.

In 1911 the number of operations performed on In-patients was 517, on Out-patients 575—a total of 1,092.

OUT-PATIENT DEPARTMENT AND FREE DISPENSARY.

The total attendance during the past year was 17,862, of whom 9,140 were boys and 8,722 girls. The average daily attendance for the year was 58.

Of the 17,862 cases treated, there were 2,016 ophthalmic or eye, 3,131 ear, nose and throat, 1,162 orthopedic, 1,641 tubercular, 4,830 medical and 5,082 surgical cases.

A comparison with the previous year shows that there has been an increase of 2,959 in the number of patients attended to in the Dispensary,

a difference of 949 in the number of new cases, and of 2,010 in the total number of patients treated.

In the Dispensary there were 33,225 prescriptions or orders filled, including daily solutions, ward requisites and chemicals.

NOT A LOCAL BUT A PROVINCIAL INSTITUTION.

It is interesting to record that during the year, outside the city of Toronto, 341 patients were admitted from 218 places in Ontario.

In 1911 there were 384 patients from 234 places in the province.

THE ORTHOPEDIC DEPARTMENT.

The doors of the Orthopedic Department are always open to all children suffering from diseases and deformities of the spine and hip-joint, and other of the more serious diseases of the bones and joints requiring surgical and mechanical treatment.

Of the 1,294 patients who received treatment in the Hospital last year, 257 were treated for deformities, including the following:—17 hip disease, 36 Pott's disease, 15 knock-knees, 57 club-feet, 12 lateral curvature of the spine, 33 paralysis, 4 wry neck, 83 tubercular disease of knee, hip and ankle.

The total number of appliances made in the shop in 1912 was 402, and the number repaired 250. The charge for these appliances was cost.

GYMNASIUM.

Daily lessons of thirty minutes are given in this department, in Swedish movements, apparatus work and games to pupils in the probationary term; besides swimming lessons, miscellaneous exercises and corrections to nurses in training.

The class conducted in corrective gymnastics by the gymnasium instructress is of inestimable value to the patients, and many splendid results have followed in this department of orthopedics.

MASSAGE.

Last year 425 in-patients received massage treatment; the daily average number of patients treated being 16.

The masseuse also gave treatments twice a week in the out-patient department, and 3 lessons weekly to senior nurses. The course of instruction is thoroughly and peculiarly adapted to the demands in general nursing.

THE X-RAY AND PHOTOGRAPHY DEPARTMENTS.

The records for the year show the following work done: 400 photographs taken, 1,650 radiographs made, 450 fluoroscopic examinations, 105 X-ray treatments for different diseases, and 125 fractures reduced under the X-ray. Special treatments for ringworm 72, sarcoma 15.

The large number of radiographs is evidence of the great importance of this help in diagnosis for both surgical and medical cases: 320 dislocations and fractures, 77 hip cases, 126 bone diseases, 290 chest and lung conditions, and 65 foreign bodies discovered.

This department is under the charge of an expert who has had a very large experience in X-ray work in the large hospitals of Great Britain.

THE LAKESIDE HOME FOR LITTLE CHILDREN.

Last summer 350 patients were cared for at the Summer Home, at the Lighthouse Point, Toronto Island, making a total of 5,613 children who have been benefited since the opening of The Lakeside in 1882.

The patients were removed from the College Street Hospital on the 5th of May, and returned the 29th October. The patients were held at The Lakeside a month longer than usual owing to the non-completion of the alterations in the wards of the Mother Hospital in College street. The weather at the Island during October was delightful, and the extra stay did incalculable good to the patients.

THE SCHOOLROOM.

356 children attended in 1912, or there was an average monthly attendance of 46.

The work this year has been varied, as the teacher has spent less time in the schoolroom and more in the wards.

She goes daily from bed to bed, teaching, and giving each patient whatever they can do; and, although the instruction is necessarily of a limited character, it has the advantage of being individual, and is of practical value to the children.

There was also a class for the patients at the Tubercular Pavilion during the summer; 65 scholars attended, or an average daily attendance of 28.

THE TRAINING SCHOOL FOR NURSING.

The Training School was established in 1886, and has on its list of graduates a total of 253 nurses. The course requires three years, and includes four months' preliminary instruction, and three months' adult nursing in an affiliated hospital. The course is both theoretical and practical. Instruction is given by means of lectures, demonstrations, teaching at the bedside, and in the regular performance of duties.

The Nursing Staff consists of the Superintendent, Assistant Superintendent, Night Supervisor, Operating Room Nurse, Teacher of Preliminary Course, Dietitian, Gymnasium Directress, Massage Instructress, Dispensary Nurse, and nurses in training, 64; of whom 8 are head nurses, 22 senior, 13 intermediate, 11 junior and 10 probationers.

The number of applicants during the year was 200, of whom 50 were accepted; 28 probationers entered the school, and 15 nurses graduated.

The following Lectures were given in 1912: 26 for juniors, 25 for intermediates, 10 special lectures for seniors, 3 weekly by the Superintendent and her assistant, three lessons weekly by the Masseuse for seniors, and weekly lesson by the pharmacist.

Special features in the School last year were: The teaching of "Invalid Occupations" to the probationers by a trained graduate, and the training of nursery maids—a four months' course; 4 of the class received certificates during the year.

DIETETICS IN THE HOSPITAL.

The teaching of Dietetics has continued without interruption during the year. In addition to the knowledge acquired, the work done in the Diet Kitchen has materially improved the character of the preparation of the food and its serving for patients.

The Probationary class receive a six weeks' course in the Diet Kitchen, and learn under the direct supervision of an expert how to prepare the many delicacies needed in a sick room.

The Cooking class and work in the Diet Kitchen in the Hospital are always enjoyed by the nurses, who take a laudable pride in preparing broths, drinks and dishes to nourish and tempt their patients.

We have added this year to our staff a resident Dietitian, who superintends the culinary department and all diets, general and special.

THE VISITING OR DISTRICT NURSE.

The work of the District Nurse has been a great aid to the Hospital, and is proving invaluable to our city.

She made 4,000 visits during the year, or an average of 75 visits per week. The number of patients visited was 750.

The gift of a motor car to the District Nurse has enabled her since July to increase her average visits per week to 150, and in rough figures her visits will total about 9,000 at the end of the year.

In connection with the Milk Laboratory, a great deal of attention has been given by the Nurse in following up the cases who have received the Baby Feedings made from the Hospital formulas.

THE MILK LABORATORY.

The Pasteurization Department conducted by the Hospital has had a very successful year. Splendid work is being done in the Laboratory, and it is one of our most interesting auxiliaries. Besides the pasteurization of milk for in-patients and out-patients, the "Infants' feedings" which it prepares and distributes are in constant and increasing demand.

The record of the year's work:—100 gallons of milk pasteurized daily; 1,500 bottles of milk distributed daily; 475 bottles of baby feedings prepared daily for outside babies—a daily average of 80 babies.

An idea of the daily detail involved may be gathered from the following:—Six people in constant attendance from morning until night. The bottles, which are of different sizes, 3, 6, 8 and 16 ozs., and which have been returned, washed and sterilized during the night, are filled with the certified milk delivered every morning from the farm, and corked with sterilized stoppers. The milk is then heated to 145 degrees Fahrenheit for at least 20 minutes in the pasteurizer, to destroy the bacteria; then chilled in ice-cold water, and labelled for distribution.

THE CARE OF TUBERCULAR CHILDREN.

A tubercular pavilion was erected at The Lakeside Home in 1910. In 1911 an extensive addition was made, and this summer the pavilion was taxed to its utmost capacity. 81 children were treated or a total number of 178 have been admitted since 1910. The pavilion has been called the "Preventorium," and is on one of the loveliest spots on The Lakeside Home grounds.

Four doctors hold a "Clinic" or "Examination" twice weekly at the out-patient department for children who have been exposed to this dread disease; to see if they are suitable cases for the "Preventorium" at the Island, or to suggest other care, either through the district nurse or the Heather Club. Last year 1,641 of these tubercular cases were examined in our out-patient department.

THE PATHOLOGICAL DEPARTMENT.

The records of the past year show the following work done: bacteriologic diagnosis, 2,900; blood examinations, 1,800; urinalyses, 1,700; milk examinations, 725; lumbar punctures, 30; autopsies, 57; surgical specimens examined microscopically, 65.

The routine milk examinations to ascertain the percentage of fat and to determine the bacterial count have been regularly made.

DENTISTRY IN THE HOSPITAL.

The Dental Clinic, a new department in the Hospital work, was organized during the year 1912.

In the past we have been too prone to look upon the mouth and its condition from the standpoint of comfort, pleasure and beauty, but the medical world has learned to regard it as the most favorable and prolific source of infection, of incubation and spreading of disease.

After a year's test of the principles, technique, practice and benefits derived from Dental Study, we can say that a modern Children's Hospital would be incomplete without a Dental Department.

The installing, however, of such a department in a hospital is by no means an easy task, and only those who have attempted its organization can realize the amount of detail or the work involved in handling the many patients who daily come under the Dentist's supervision.

The record of the year's operations were: Examinations, 135; fillings, 200; treatments, 100. The Department is under the supervision of J. A. Bothwell, L.D.S., D.D.S., who has spent a great deal of time in and out of the Hospital in organization, besides practical work in the Clinic.

NEW COTS DURING THE YEAR.

The following cots have, by the payment of \$2,000, been named in perpetuity in the Hospital in College street in 1912:—

"The Frank Elmore Harris Cot," by bequest of the late Rev. Dr. Elmore Harris, Toronto; "The James Seal Cot," by Mrs. James Seal, Toronto; "The Isabelle Forster Cot," by bequest of the late A. E. Forster, Toronto; "The Sammie M. Haight Cot," by Mrs. J. V. Teetzel, Toronto; "The Jessie Dickson Wright Cot," by bequest of the late Mrs. J. D. McCulloch, Toronto; "The J. Herbert Mason Cot," by bequest of the late J. Herbert Mason, Toronto.

The following cots, by the payment of \$100 per year, were named to be maintained annually in the Hospital in College street:—

"The Zeta Masonic Cot," by Zeta Lodge, 410, A. F. & A. M., Toronto; "The Ruth Barclay Cot," by Mr. and Mrs. J. B. Ketchen, New Lowell; "The Eliza Merilla Broddy Cot," by bequest of the late Robert Broddy, Brampton; "The Brantford Public Schools' Cot," by Public school children, Brantford; "St. Peter's Anglican S.S. Cot," by St. Peter's Anglican S.S., Toronto; "The Muriel King Cot," by Willing Workers' Society, Davisville Methodist S.S. The following was received after close of Hospital year: "The Lord's Tenth Cot," in loving memory of J. H. G., Winnipeg, by Mrs. C. Gardner, Toronto.

The following cots, by a payment of \$25 a year, were named to be maintained annually at The Lakeside Home, Toronto Island:—

"The Jean and Burton Cot," by Jean and Burton Millar, Pembroke; "The Harbord Collegiate Institute Cot," by the pupils of Harbord Collegiate Institute, Toronto; "The Blair Fergusson Cot," by Mrs. G. T. Fergusson, Toronto; "The Alliston School Cot," by Public school children, Alliston; "The Port Arthur Central School Cot," by Public school children, Central School; "The Port Arthur North Ward School Cot," by Public school children, North Ward School; "The Port Arthur South Ward School Cot," by Public school children, South Ward School; "The Love and Friendship Cot," by the Delta Alpha Class, Thorold; "The William T. Hall Cot," by Mr. Thomas Hall, St. Thomas; "The Lyde Thorne Cot," by Mrs. A. Tuck, Stoney Creek; "The Ridgeway Methodist S.S. Cot," by Methodist S. S., Ridgeway; "The Sunbeam Cot," by Trinity Methodist S. S., Port Arthur.

BEQUESTS IN THE YEAR.

The Trustees acknowledge with thanks bequests from estates of:

Henry James, Brantford, \$250; A. B. Lee, Toronto, \$500; R. R. Newborn, New Toronto, \$5,063.10; Alister MacKay, Chatham, \$500; Daniel McMichael, Shelburne, \$500; Walter Thomson, Mitchell, \$500; Ann Robinson, Toronto, \$61.80; A. H. Wilford, Wingham, \$250; Agnes Harvey, Seaforth, \$1,627.65; William Warren, Montreal, \$255; Robert Armstrong, Bowmanville, \$1,969; Mary Ann Whetham, Galt, \$100; S. F. McKinnon, Toronto, \$1,000; Selina Gillbard, Cobourg, \$1,000; Donald C. MacDonald, Toronto, \$1,200; Mrs. J. E. C. Mathieson, Campbellford, \$100; John Scott, Thamesville, \$1,150; Thomas Cross, Toronto, \$200; J. Elmore Harris, Toronto (for cot), \$2,000; income, estate of W. E. H. Massey, Toronto, \$198.40.

RECEIPTS AND EXPENDITURE.

The receipts applied to Maintenance Account last year were \$95,685, while the expenditure on the same account was \$104,474. In 1911 the receipts were \$82,280, with an expenditure of \$93,942. While there is an increase in the expenditure of \$10,532, it is encouraging to note that there is also an increase in the receipts of \$13,405. The increase in the expenditure for maintenance is due mainly to necessary expenses. Staple articles of food have increased, notwithstanding that every article is purchased at the closest price, and by tender where possible. Increased

THE HOSPITAL FOR SICK CHILDREN, TORONTO.

cost of fuel, increase in wages account, dispensary supplies, insurance premiums falling due, and over 3,000 extra patients all help to account for the increase in expenditure last year.

On capital account the expenditure was very heavy. The Lakeside Home, which has served us so well for thirty years, had to have general repairs, a new roof, new floors for balconies and verandahs; in fact the entire building, interior and exterior, was in the hands of painters, carpenters, plasterers, and other artisans, for nearly three months. The other buildings on the grounds had, to a greater or lesser extent, to undergo repairs. To-day The Lakeside Home is perfect and will not require repairs for another twenty years.

Then it was necessary to erect a Boys' Surgical Pavilion so that more patients could be treated at The Lakeside Home. This building cost \$3,973, and was erected by Mr. J. Ross Robertson from money given some years ago. It should be stated that the cost of all the repairs to The Lakeside Home has been defrayed by a donation of \$20,000, made by Mr. Robertson in 1909-10, and has not been taken out of funds contributed by the general public for maintenance.

THIS APPEAL IS FOR YOU.

Surely this effort of the Trustees to secure funds to defray not only the large deficit on maintenance account, but money for current expenses for the same purpose, will appeal to you.

Remember that your pocket-book must be the Hospital's friend if the Hospital is to be the children's friend.

Remember that MERCY FROM THE HOSPITAL is needed in thousands of homes and MONEY FOR THE HOSPITAL is needed from thousands of pockets.

Remember that your money can plant an oasis of hope and health and happiness in the weary desert of many a little life.

Remember that your money can help the Hospital build a bridge over which the feet of little children may travel on the journey from sorrow to joy, from sickness to health—aye, from death to life.

Remember that the ring of your money in the Hospital's treasury is a Christmas chime that finds its echo in the Hospital's deeds of help and mercy throughout the year.

Remember that your money will be the sunshine that spreads the tears of sympathy into a rainbow of hope across the sky of some child's life.

Remember that Christmas calls you to open the purse of your kindness to the Hospital that the Hospital may open the heart of its help to the children.

"Write me as one who loves his fellow-men," said Abou Ben Adhem, and the Hospital needs everywhere a friend whose money says "Write me as one who loves the little children."

For the Trust,

J. ROSS ROBERTSON,

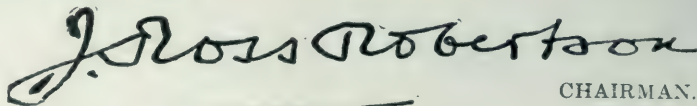

E. B. OSLER,

GEORGE A. COX,

JOHN FLETT,

J. STRACHAN JOHNSTON,

} Trustees.

CHAIRMAN.

The Nurses Trained in The Hospital for Sick Children stand in the front rank alongside of the best trained from any hospital in the world.

The School offers a three years' course with a preliminary term of four months included. Every nurse receives during her term three months' training in adult work—Gynaecological and Obstetrical. In 1912—15 graduated. There are 64 in training—8 are head nurses—22 senior—13 intermediate—11 junior and 10 probationers.

Operating Theatre—Preparing for an Operation.

There were 1,307 operations performed in 1912. On In-Patients 496 ; Out-Patients 811—Total 1,307.

THE HOSPITAL FOR SICK CHILDREN, TORONTO.

AUDITORS' REPORT, HOSPITAL FOR SICK CHILDREN.

To the Chairman of the Trust—Dear Sir,—We beg to certify that the Receipts and Disbursements of the Hospital for Sick Children have been carefully audited with the vouchers and bank account throughout the year ending Sept. 30, 1912, and the accompanying statements of Income and Expenditure and of Assets and Liabilities bearing our signature are a true and correct account of the affairs of the Hospital to that date. The books and work of the office are well looked after, and all desired information has been freely given. Respectfully submitted,

Toronto, Oct. 18, 1912.

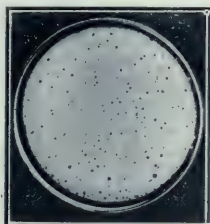

A. C. NEFF & CO., Chartered Accountants.

DR. HASTINGS, MEDICAL HEALTH OFFICER OF TORONTO, SAYS: "IF THE TRUTH WERE KNOWN THE EPITAPH ON THE VAST MAJORITY OF THE TOMBSTONES ON THIS CONTINENT MARKING THE GRAVES OF CHILDREN UNDER TWO YEARS OF AGE WOULD BE 'POISONED BY MILK.'"

THE PASTEURIZATION DEPARTMENT.

The only scientifically pasteurized milk in Canada is the supply of this Hospital. The milk has saved the lives of scores of babies, and has to a great extent eliminated "intestinal trouble." Mothers know what this means.

Last year in the Milk Laboratory 100 gallons of milk were pasteurized daily. 1,500 bottles were distributed daily. 475 bottles of Baby Feedings prepared daily for outside babies. A daily average of 80 babies.

BABIES FED
ON
HOSPITAL
FORMULAS

These little ones were at death's door when they came to the Hospital.

Just note that the count of ordinary bulk milk runs from 20,000 to 50,000 per cubic centimeter or twenty drops of milk. Certified milk counts from 400 to 2,000. For the pasteurized milk at this Hospital the count is zero. The plant is the same as that of Nathan Strauss of New York. Last summer a return of the Strauss work in New York showed that out of 2,265 babies fed on this milk only one died, and that was from pneumonia.

YOUR MONEY CAN HELP THE HOSPITAL BUILD A BRIDGE OVER WHICH THE FEET OF LITTLE CHILDREN TRAVEL ON THE JOURNEY FROM SORROW TO JOY, FROM SICKNESS TO HEALTH, AYE, FROM DEATH TO LIFE.

THE HOSPITAL FOR SICK CHILDREN, TORONTO.

COTS NAMED AND MAINTAINED IN PERPETUITY IN THE HOSPITAL

These Cots are named and maintained in perpetuity by a payment of \$2,000.

<i>Name of Cot.</i>	<i>Est'd. By Whom Endowed.</i>

This record of especially the last twenty-two years shows that the objection parents have had to sending their sick little ones to the Hospital has been largely overcome.

Please remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec.-Treas., College Street, Toronto.

IF YOUR DOLLAR COULD STRAIGHTEN THE FEET of a LITTLE BOY OR GIRL WITH CLUB FEET YOU WOULD GLADLY GIVE IT. YOUR DOLLAR WILL DO THAT

What the Skilled Hand of the Surgeon has done

—FOR CHILDREN WITH CLUB FEET, BOW LEGS AND KNOCK KNEES—

BEFORE.

BEFORE.

BEFORE.

BEFORE.

4 CASES OUT OF 57 LAST YEAR

257 CASES OF DEFORMITY.

Fifty-seven had club feet, fifteen had knock-knees, four had wry neck, all corrected.

Three of the following examples show an ordinary case of club feet before and after operation. The fourth example, the larger cut on the left of the page, shows an X-ray of the foot and a photo before operation. The cut on the right of the page shows an X-ray and a photo of the same foot after operation. The correction was perfect. The object in showing the X-ray is so that the bones of the foot may be seen both before and after operation.

A QUICK REPLY.

A Trustee was walking through the Boys' Surgical Ward the other day enquiring into some of the accident cases. One lad was asked how he came by his accident. His reply was: "It wasn't an accident at all that brought me here. I've got double congenital hip, and it'll be hip, hip, hurrah when I get out of here."

AFTER.

WHAT THE X-RAY DOES.

It Shows Exactly the Position of :

Bones and Fractures	Foreign Substance in	Defect in Bones from
Needle in Foot	Stomach	Birth
Metal in Eye	Bullets in any part of	Progress of Disease
Coin in Gullet	body	

IT DOES IN THREE SECONDS WHAT USED TO TAKE THREE MINUTES.
A PHOTO. IN 15 MINUTES INSTEAD OF ONE HOUR. PLATES EVERY
THREE MINUTES WHILE SURGEON OPERATES.

WILL YOU HELP US IN THIS WORK?

It is the Dollars of the people of Ontario that enables the Hospital to install apparatus that is the greatest service to surgeons in operating. You'll never miss a dollar.

Please remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec.-Treas., College Street, Toronto.

YOUR MONEY WILL AID THE HOSPITAL IN ITS WORK OF RELIEVING THE TERRIBLE DEFORMITY THAT VANISHES AT THE COMMAND OF SURGEONS WHO HANDLE SUCH CASES.

From 1875-1912-299 cases of Hare-lip, 225 cases were discharged corrected. These Photos are Taken from Life: WILL YOU HELP WITH YOUR DOLLAR TO CORRECT THESE DEFORMITIES?

BEFORE

AFTER

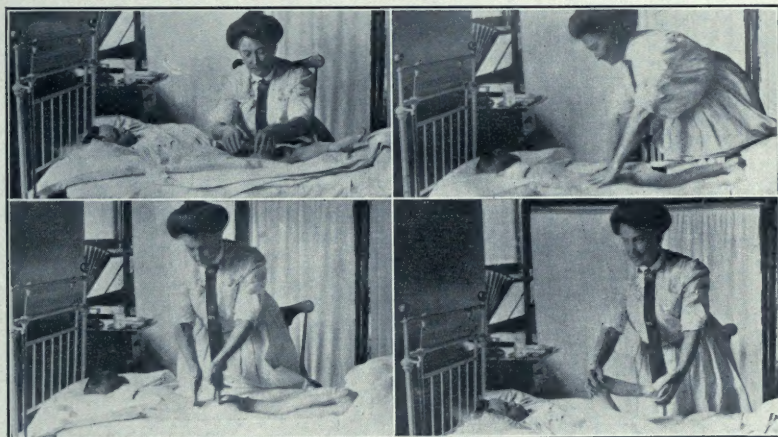

BEFORE

AFTER

The correction is so perfect and so changes the facial expression in the case of babies that mothers hardly recognize their own children.

MASSAGE - An Act That Nothing but the Human Hand Can Perform

THE MASSEUSE AT WORK

LAST YEAR OF 1,294 IN-PATIENTS 425 RECEIVED MASSAGE. AVERAGE NUMBER OF 16 TREATED DAILY.

A boy aged 6, admitted in 1912, suffering from Sunstroke, for four weeks quite off his head, could not sit up or walk, muscles wasted. Six weeks' massage sent him home in perfect health.

The results of Massage are marvellous. This is one of a score of cases that could be quoted.

WILL YOU HELP US IN THIS GOOD WORK? HAVE YOU A SPARE DOLLAR?

Please remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec.-Treas., College Street, Toronto,

"THROW OUT THE LIFE LINE" OF YOUR LIBERALITY TO THE HOSPITAL, SO THAT THE HOSPITAL MAY LENGTHEN AND STRENGTHEN THE LIFE LINE OF ITS MERCY TO THE SUFFERING LITTLE CHILDREN

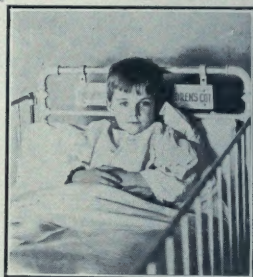

A YOUNGSTER FROM THE
"CHILDREN'S AID."

RESULTS OF TREATMENT:

Patients Treated	1,294
Cured	565
Improved	345
Unimproved	75
Died	159
Remained in Hospital. .	150

*Of those who died 127, or
80 per cent. were beyond
hope when admitted.*

"WELL, I'M GLAD I'M ABLE TO
SIT UP."

Recognizing the magnificent work done by the Hospital and the large increase of city in and out patients, the City of Toronto increased its grant from \$18,000 to \$25,000 yearly.

A SINGLE DOLLAR CONTRIBUTED TO THE HOSPITAL GIVES ONE PAIN-
RACKED CHILD ALL THAT HUMAN SKILL AND LOVING NURSING
CAN DO THROUGHOUT A TEDIOUS DAY OR RESTLESS NIGHT

THE HOSPITAL SERVES THE PROVINCE OF ONTARIO.

In 1891, 40 patients were received from 27 places, and last year (1912) 341 patients were received from 218 places outside of Toronto. Over 50 per cent. of these were sent home cured, 29 per cent. improved.

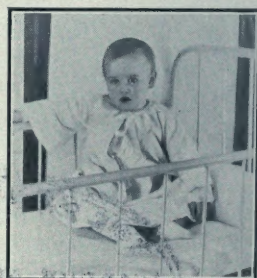

"SAY, MOTHER'S COMING
TO-DAY."

CLASSIFICATION OF PATIENTS:

Protestants	1016
Roman Catholics	123
Other Religions	155
Canada	596
England	380
Ireland	28
Scotland	93
Other Countries	197

*The Hospital is open to
patients of every color, race
or creed.*

"PLEASE, NURSE, MAY I
SIT UP?"

The Christmas thought of Bob Cratchit's Tiny Tim was that the sight of his crippled little figure might make people think of "Him who made the lame to walk and the blind to see." The Hospital has many a Tiny Tim to take care of, and your money can help the Hospital's Tiny Tims.
